

Problem Statement:

News reading is the basic source of gaining knowledge about the external growing world. People read newspapers to gain knowledge about what is happening around the world. Without newspaper people cannot be able to educate themselves about the outside world. In Modern Era this kind of culture changed, and Television and Radio are used as a better source of communication and knowledge gathering tool.

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help. Today there are several easy to educate ourselves, one of the easier ways is watching news in our mobile phone. Just tell us what market news you're interested in and get a quick peek for the day. Only read what you feel is relevant and save your time.

The main aim is to develop a web application to track news and ongoing news feeds and displaying them. This app helps you to query for all information about Indices, Commodities, Currencies, Future Rates, Bonds, etc.
